

## Grisoft AVG Anti-Malware

### Anti-Virus & Anti-Spyware Software

AVG Anti-Malware offers maximum virus and malware protection, product customization and free virus database updates and technical support for two years. Most importantly, the user interface is accessible to both screen readers and Large print PC access software.

#### AVG Anti-Malware Includes:

- ▶ AVG Resident Shield Virus Protection
- ▶ AVG Anti-Spyware Technology Protects from Spyware, Adware and Other Malicious Programs
- ▶ Easy-To-Use Accessible Interface
- ▶ AVG E-Mail Virus Scanner
- ▶ AVG On-Demand Virus Scanner
- ▶ Scheduled Tests: Daily, Weekly Or Monthly
- ▶ Registry Scanning And Recovery
- ▶ Free Virus Database Updates And E-mail Tech Support For Two Years
- ▶ AVG Update - Email Information On Virus Protection
- ▶ Intelligent Virus Detection
- ▶ Password Protected Program Settings
- ▶ Automatic Internet Based Update Feature
- ▶ Automatic Healing And Virus Vault For Safe Handling Of Infected Files
- ▶ AVG Anti-Virus Is VB100%, ICSA Labs, and West Coast Labs Checkmark Certified
- ▶ AVG Anti-Virus Has A Small Footprint Saving System Resources

#### 100% Virus Detection

AVG's scanning engine has received numerous awards for its excellent detection of "in the wild" viruses, including the VB100% award. Its unique combination of detection methods provides full protection against viruses, worms and trojans.

#### Cutting-Edge Anti-Spyware Technology

Using the latest state-of-the-art detection technology, AVG detects spyware, adware, DLL-trojans, keyloggers, and much more. Malware hidden in data streams, archives, or the Windows registry is also detected.

#### Full On-Access Protection

The powerful AVG Resident Shield provides maximum protection by scanning every file opened, executed, or saved. It also prevents the opening or executing of infected files.

#### Flexible Intelligent Scanning

The AVG Resident Shield can include/exclude files from being scanned based on individual file extensions and can handle exceptions for potentially unwanted programs such as adware.

## Full E-mail Protection

AVG checks every e-mail sent or received, providing full protection from e-mail-borne threats. AVG supports all leading e-mail clients, including MS Outlook, The bat!, Eudora, and all other SMTP/POP3-based e-mail clients, such as Outlook Express. Encrypted connections using SSL are also supported.

## Automatic Threat Handling

AVG can automatically heal or remove infected files and other threats such as trojans, worms and spyware.

## Powerful Scheduling

AVG automatically provides recommended daily schedules for scanning and updating, and also allows you to create custom-scheduled events.

## Multiple Language Support

No need to buy a special language version.

The new user interface supports more functions and user settings, including the user-definition of shortcut buttons for the most-used functions. The number of scheduling options for updates and Tests has been increased and includes alternatives to run tasks even when the schedule was missed (such as when the computer was switched off or the Internet was not accessible). Scheduled tasks can be performed even when no user is logged on to the computer.

The Resident protection in AVG works continuously in the background and detects viruses with the same efficiency as the main program. Thanks to the testing core in AVG the Resident Shield can now utilize the heuristic emulator and the entire virus database. The advantage of this approach is that it is capable of stopping a virus before it invades your hard disk even if you do not run the main program on a regular basis.
