

# DOCKING STATIONS AND PORT REPLICATORS FOR EVAS' DELL™ D-SERIES NOTEBOOKS

## D/PORT ADVANCED PORT REPLICATOR

Maximize your workspace while expanding your notebooks capabilities with the Latitude D/Port. The D/Port provides convenient cable management and alleviates the need to re-connect peripherals each time you return to your desk. One simple connection provides access to 15 expansion ports including: VGA, DVI, S-Video, Parallel, 2/Serial, PS/2, Headphone, S/PDIF, 4/USB 2.0, RJ-11, RJ-45 and D/Bay Port for connecting external D/Bay drive modules. In addition, obtain workspace flexibility and viewing expandability with D/Port flat panel and dual-display support.

## D/DOCK EXPANSION STATION

Obtain exceptional expandability with the D/Dock Expansion Station. In addition to providing the same 15 expansion ports as the D/Port, the D/Dock provides a half-height standard PCI slot and an internal media bay supporting Latitude D-Family and Dell Precision M60 Media Modules and media module battery charging. The D/Dock also offers flat panel and dual-display support.

## D/VIEW NOTEBOOK STAND

The Latitude D/View notebook stand, in combination with the D/Port, allows you to view your system at a whole new level by elevating the notebooks LCD to a comfortable viewing position – eliminating the need for an external display. This sleek, all-in-one solution allows you to reduce desktop space by approximately 40%. The D/View's convenient cable management channel is ideal for use with your full-sized keyboard and mouse in addition to all of your other essential peripherals via the 15 ports available on the D/Port.

Note: D/View Requires But Does Not Include The D/Port Replicator.

D/View uses approximately 40% less desktop space than if using a Port Replicator with a 17" CRT monitor.

## D/STAND MONITOR STAND

Used with the D/Dock or D/Port, the D/Stand Monitor Stand offers a compact, space-saving footprint and customizable D/Port docking positions. Two easy access buttons, with status indicator LEDs, are provided for power and undocking convenience. Activity lights for the system hard drive and eject status are also provided. The sleek, open side design allows convenient access to media bays and frequently used ports while supporting optional monitors.
