Dell™ and EVAS Alliance: EVAS, an industry-leading provider of integrated accessible systems, has teamed with Dell, the world's leading computer systems company, to provide Computer-Based Assistive Technology Solutions specifically designed for people who are visually, physically, hearing or learning disabled. Now, people with disabilities can benefit from EVAS' experience as a provider of accessible computers and the superior quality, support and service offered by Dell. EVAS Dell Xtra Series Systems are tools that can be used to gain independence – an independence that can open doors to an education or employment opportunities and a better quality of life. These Plug & Play Solutions are fully integrated and run right out of the box with application software, peripherals and Access Technology installed and configured.

EVAS offers Optional Packages that enhance the use, support and service of the Dell Xtra Series System. These packages include Toll-Free and Remote Access System Support, System Recovery Software, as well as Large Print or Tactile Keyboards, Surge Protectors, Diskettes and other useful peripherals. Xtra Series Option Packages also come with innovative Remote Access Support. Connecting through Internet, this software allows EVAS engineers to work on computers anywhere in the US. The system engineer can see firsthand the difficulties the end user is experiencing. Diagnostics and hardware and software reconfigurations can be run to restore the system and minimize downtime. EVAS will combine Dell Computers, application software, peripherals and Access Technology to create a Plug & Play System that will meet both your accessibility and computing needs. You can visit our website for more information or call or e-mail EVAS if you have questions or would like a system designed and priced.
