

Datalux Space Saving Keyboards

Desk Keyboard

The Desk model features a gradual elevation from front to back. All features, such as multi-key rollover, caps, numbers and scroll lock, of standard keyboards are also found on the Datalux Space Saver Keyboard. The Desk model keyboard is recommended for most applications since it is weighted to hold position firmly when in use. The standard cable supplied is straight and 5 feet long. The Desk model keyboard is also available with a GlidePoint Trackpad and in a charcoal color.

Flat Tray Keyboard

The Space-Saver keyboard is also available in a Tray model which is recommended for portable applications. This unit has the same layout but is not weighted and has folding feet for elevation to a comfortable angle. Tray keyboards have a standard straight cable supplied with a length of five feet. The Tray model is also available in white and with or without a GlidePoint Trackpad.

GlidePoint

Datalux Space-Saver Keyboards are now available with the award-winning Cirque GlidePoint® trackpad. GlidePoint transforms the way you interact with the computer by lightly gliding your finger across GlidePoint's surface. Click, drag and highlight by gently tapping on the pad. The GlidePoint feature is available in both desk and tray models.

Note: Specifications are subject to change without notice and depend on availability. Please review our price list or visit www.evas.com for current availability and specifications.
