

QUALIHOME

AND QUALIHOME PRO

QualiHOME is an advanced and flexible environmental control application which plugs into the QualiWORLD platform. QualiHOME allows the user to control electrical devices, such as lights, electric beds, automatic doors, alarms, ventilators and much more. Even completely paralyzed people can have full control of their own environment, using QualiHOME and a computer. The user has the freedom to choose any of the computer accessibility solutions available within QualiWORLD. QualiHOME works in conjunction with a variety of environmental control systems including Infrared Signals (IR), Radio-Frequency (RF) and Power Line (X10) to control any electrical devices in the user's room or throughout the building. QualiHOME's Macro Editor enables the user to add many commands to one single button, controlling an unlimited number of devices by just one click.

For those users who are more comfortable with the Windows operating system or who's disability is mild, QualiHOME Pro provides the same functionality in the Windows environment. QualiHOME Pro is fully compatible with QualiLIFE's other Windows applications, such as QualiEYE, QualiKEY and QualiCLICK.

MAIN FEATURES

- Manage QualiHOME with any of QualiWORLD's computer Access Methods that replace the mouse and keyboard: Auto Scan, Manual Scan, Auto Click, X/Y Mouse, Radar Mouse, Directional Mouse, QualiKEY Onscreen Keyboard, QualiEYE Head Mouse or any other manufacturers external switch or pointing device

- Options such as dimming, sunscreen control, integration with alarm systems and much more
- History of executed commands available as an Activity Report
- Multi language and Multi user

EVAS offers a variety of Technology Solutions that provide access to computers, information, communication and environmental controls for people with physical disabilities. Desktop or notebook computers are an integral part of the solution. QualiWORLD, a Windows compatible software platform, is at the heart of our systems. Now, daily tasks like writing letters, reading documents, communicating verbally, sending/receiving e-mail, using the phone, sending Text Messages, faxing, surfing the Net, watching TV, listening to the radio or controlling the home environment are all available in a seamless solution.

QualiWORLD: QualiWORLD combines QualiKEY and QualiEYE with a variety of input and management tools creating seamless computer access. QualiWORLD also manages a family of plug-in, access specific, application programs. Choose from eleven plug-in applications to create a customized Accessibility Suite. QualiWORLD can be run by ability switches, pointing devices or voice commands. Once selected, the preferred access method will control all the applications; creating a consistent, easy to use solution.

Dell™ and EVAS Alliance: EVAS, an industry-leading provider of integrated accessible systems, has teamed with Dell™, the world's leading computer systems company, to provide Plug & Play Computer Solutions specifically designed for people who are visually, physically, hearing or learning disabled.

A Total Solution: EVAS will combine Dell Computers, application software, peripherals and Access Technology to create a Plug & Play System that will meet both your physical and computing needs. EVAS offers a wide range of access technology for people who are visually, physically, hearing or learning disabled and can create systems for people with multiple disabilities. You can review the five Technology Overviews on our website for more information. Please call the EVAS Customer Support Team at 800-872-3827, if you have questions or would like a system designed and priced.
