

QUALIPHONE

AND QUALIPHONE PRO

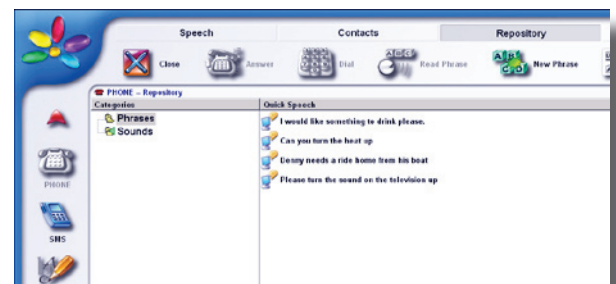

QualiPHONE is QualiWORLD's plug-in phone application that makes it possible for people with disabilities to make and receive phone calls without the assistance of another person or without using a standard telephone, even if they can not speak. The user has the freedom to choose any of the computer accessibility solutions available within QualiWORLD. People who can speak can handle the conversation using the computer microphone while listening to the other person through the speakers. People with speech difficulties, or who cannot speak, can carry on a conversation using QualiPHONE's text-to-speech engine. The user enters the message they would like to say during the phone conversation. The computer dials the desired phone number and then reads the message to the other person. Texts for the conversation can be prepared in advance and stored under different categories. The recipient's reply can be heard through the computer speakers. QualiPHONE allows people with speech impairments or physical disabilities to handle complex live two-way phone conversations, including questions and answers. The programs QualiMOBILE feature can be used.

For those users who are more comfortable with the Windows operating system or who's disability is mild, QualiPHONE Pro provides the same functionality in the Windows environment. QualiPHONE Pro is fully compatible with QualiLIFE's other Windows applications, such as QualiEYE, QualiKEY and QualiCLICK.

MAIN FEATURES

- Manage QualiPHONE with any of QualiWORLD's computer Access Methods that replace the mouse and keyboard: Auto Scan, Manual Scan, Auto Click, X/Y Mouse, Radar Mouse, Directional Mouse, QualiKEY Onscreen Keyboard, QualiEYE Head Mouse or any other manufacturers external switch or pointing device
- The system can read out-loud any phrase or word stored in the repository.
- Speed up conversations by storing often-used phrases and words in categories
- Telephone numbers can be stored in a personal and very detailed Contact Manager
- Makes phone conversations accessible to people with speech impairments or physical disabilities
- Compatible with most communication technologies including: Analog, ISDN, GSM-GPRS, Voice Over IP
- Includes QualiMOBILE which allows the user to make cell phone calls
- Multi language and Multi user

QualiPHONE's repository holds frequently used phrases and sounds for quick recall while speaking on the telephone.

EVAS offers a variety of Technology Solutions that provide access to computers, information, communication and environmental controls for people with physical disabilities. Desktop or notebook computers are an integral part of the solution. QualiWORLD, a Windows compatible software platform, is at the heart of our systems. Now, daily tasks like writing letters, reading documents, communicating verbally, sending/receiving e-mail, using the phone, sending Text Messages, faxing, surfing the Net, watching TV, listening to the radio or controlling the home environment are all available in a seamless solution.

QualiWORLD: QualiWORLD combines QualiKEY and QualiEYE with a variety of input and management tools creating seamless computer access. QualiWORLD also manages a family of plug-in, access specific, application programs. Choose from eleven plug-in applications to create a customized Accessibility Suite. QualiWORLD can be run by ability switches, pointing devices or voice commands. Once selected, the preferred access method will control all the applications; creating a consistent, easy to use solution.

Dell™ and EVAS Alliance: EVAS, an industry-leading provider of integrated accessible systems, has teamed with Dell™, the world's leading computer systems company, to provide Plug & Play Computer Solutions specifically designed for people who are visually, physically, hearing or learning disabled.

A Total Solution: EVAS will combine Dell Computers, application software, peripherals and Access Technology to create a Plug & Play System that will meet both your physical and computing needs. EVAS offers a wide range of access technology for people who are visually, physically, hearing or learning disabled and can create systems for people with multiple disabilities. You can review the five Technology Overviews on our website for more information. Please call the EVAS Customer Support Team at 800-872-3827, if you have questions or would like a system designed and priced.
