

QualiSPEAK is an easy-to-use and flexible communication program for people who cannot speak or speak with difficulty. QualiSPEAK reads out loud the words or a phrase displayed on the screen and by doing so speaks for the user, allowing fast verbal communication even for non-speaking people. Users can create and manage categories where most used phrases or words related to the subject of the category can be stored and organized. For example, in the “Greeting” Category the user can store phrases such as “How are you?”. Using Categories simplifies and speeds up the selection of the text that the user wants to use in a particular situation. QualiSPEAK uses an advanced text-to-speech engine that produces clear and easy to understand speech output. The user can choose a male or female voice. QualiSPEAK can be managed using any of the various computer access solutions available within the QualiWORLD Platform.

For those users who are more comfortable with the Windows operating system or who’s disability is mild, QualiSPEAK Pro provides the same functionality in the Windows environment. QualiSPEAK Pro is fully compatible with QualiLIFE’s other Windows applications, such as QualiEYE, QualiKEY and QualiCLICK.

## MAIN FEATURES

- Handle verbal communication using any of QualiWORLD’s Access Methods that replace the mouse and keyboard: Auto Scan, Manual Scan, Auto Click, X/Y Mouse, Radar Mouse, Directional Mouse, QualiKEY Onscreen Keyboard, QualiEYE Head Mouse or any other manufacturers external switch or pointing device

writing communicating  
faster and easier in  
QualiSPEAK**

**EVAS** offers a variety of Technology Solutions that provide access to computers, information, communication and environmental controls for people with physical disabilities. Desktop or notebook computers are an integral part of the solution. QualiWORLD, a Windows compatible software platform, is at the heart of our systems. Now, daily tasks like writing letters, reading documents, communicating verbally, sending/receiving e-mail, using the phone, sending Text Messages, faxing, surfing the Net, watching TV, listening to the radio or controlling the home environment are all available in a seamless solution.

**QualiWORLD:** QualiWORLD combines QualiKEY and QualiEYE with a variety of input and management tools creating seamless computer access. QualiWORLD also manages a family of plug-in, access specific, application programs. Choose from eleven plug-in applications to create a customized Accessibility Suite. QualiWORLD can be run by ability switches, pointing devices or voice commands. Once selected, the preferred access method will control all the applications; creating a consistent, easy to use solution.

**Dell™ and EVAS Alliance:** EVAS, an industry-leading provider of integrated accessible systems, has teamed with Dell™, the world's leading computer systems company, to provide Plug & Play Computer Solutions specifically designed for people who are visually, physically, hearing or learning disabled.

**A Total Solution:** EVAS will combine Dell Computers, application software, peripherals and Access Technology to create a Plug & Play System that will meet both your physical and computing needs. EVAS offers a wide range of access technology for people who are visually, physically, hearing or learning disabled and can create systems for people with multiple disabilities. You can review the five Technology Overviews on our website for more information. Please call the EVAS Customer Support Team at 800-872-3827, if you have questions or would like a system designed and priced.
